

Question 1	Response 1
Will slides be made available after session today?	Yes
Wetlands across the world? Just our state?	Focus is wetlands in Southeast MI
I have 4 students on my school team, will I split up this team into 2 and 2 for this event on event day?	Yes, 2 second graders, 2 3rd graders.
We have field guides that were handed down from coaches at our school a few years ago - can you clarify what guide(s) are recommended/allowed?	They may not be relevant. Please use the study guide that will be posted on the website. You can share the guide you have on Discord and we can see if it will be useful to you.
Are there any child appropriate books that you can suggest to accompany this event? Like the sibley bird book?	Not really sure. Use the info in the study guide and the resources that are referenced in that. If someone finds something helpful, please post on Discord.
Where can we access the study guide?	That will be on the What Went By event page on the web
And what grades is this event open to?	2 and 3
Is the focus Michigan based wetlands?	Yes, southern half of the lower peninsula
For a 3rd grade team of two, about how many hours/meetings per month would you expect would be sufficient for students being successful in this event, for example one 2-hour meeting per week? I understand there are so many variables that would affect this, but a rough idea	1 hr once a week until the tournament is a good place to start. Whatever your team can handle
Is there a takeaway you want from the students after the event to share with other students to support conservation knowledge?	We would love them to become excited about wetlands and share that excitement with their friends and families. We want them to get outside and appreciate nature. We hope the you will report back and let us know what was impactful.
